Experience

Richard is a senior consultant – Analyst in Ruck Shockey Associates, Inc, an S-Corporation formed in 1997. He is a retired veteran senior consultant with Berkeley Research Group's Healthcare Performance Improvement practice who brings over 35 years of diverse operational experience focusing on large-scale project management, operational process design, data analysis, modeling, supply chain, and stakeholder management. He is well versed in bringing together perspectives and data from across organizations by identifying and implementing strategies that drive sustainable operational improvements. His recent projects include implementing enterprise-level strategic plans, developing and leading comprehensive performance improvement programs, and the SME with several initiatives in facilities-engineering, construction service management, bio-clinical engineering, and other non-clinical support services initiatives. His experience includes having held senior level C-Suite management positions with several major health care systems. His clients include integrated delivery networks (IDNs), academic medical centers, community-based healthcare systems, and life sciences companies.
