Experience

Chef Bergman has over 35 years of customized culinary services for corporate, non-commercial, healthcare and private clients. He provides menu concept development, recipe development, menu engineering, culinary training, food safety and HACCP compliance strategies, food production planning and auditing services.

After his formal culinary training, Chef Bergman trained with some of the most talented chefs in the region including Herve' Glin at the nationally-acclaimed Cite' Grill and Bruce Molzan at Ruggles Grill. Chef Bergman transitioned from the fine dining restaurant arena into one of the nation's first Executive Chefs in Healthcare at The Methodist Hospital. He oversaw operations for high profile patients such as former Presidents and professional athletes as well as the 6,000 meals per day for patients, staff and visitors. In his role Steve redeveloped 12,000 SF of retail and 20,000 SF of kitchen space with an advanced production operation.

His culinary journey continued to evolve and began full time consulting in 2004 and his partnership with Ruck-Shockey Associates, Inc. followed in 2005. His support of clients and the culinary focus has positioned many to achieve culinary success, rave reviews for the menus and food production efficiencies.
